THE JOURNAL OF THE OPTICAL SOCIETY OF AMERICA is the official organ of the Society, and is devoted to original papers on experimental, theoretical and applied optics, in all its branches, including research, instruction, manufacture and design of optical instruments, as well as physiological and medical optics. It is published monthly by the American Institute of Physics Incorporated for, and under the editorial management and control of, the Optical Society of America.

NOTICE FOR CONTRIBUTORS

Manuscripts for publication should be sent to F. K. Richtmyer, Cornell University, Ithaca, New York. Papers are published in English only. To be acceptable for publication manuscript should be original typewritten copy (not carbon copy) either double or triple spaced, with wide margins. References should appear as footnotes only and should be numbered consecutively to avoid repetition. References should include author's name, journal, volume number, page number and year and should be listed in the order given here. Attention should be given to captions for tables and legends for figures. These in all cases should be complete in themselves so as to make the data intelligible to the reader without consulting the text of the article.

Special care should be given to mathematical expressions. The very simplest formulas only should be typewritten and all others carefully written in with pen and ink. Fractional exponents should be used to avoid root signs everywhere. Extra symbols should be used to avoid complicated exponents. The solidus (/) should be used wherever possible for fractions.

All illustrations should accompany manuscript and should always be referred to in the text. Line drawings must be made with India ink on plain white paper or on tracing cloth. Coordinate paper is not desirable, but if used must be blue-lined with all coordinates to be reproduced drawn with India ink. Lettering should be of sufficient size to be legible after reduction.

Proof and all correspondence concerning papers in the process of publication should be addressed to the Editorial Secretary, American Institute of Physics, 11 East 38th Street, New York, New York.

A portion of the cost of publishing the results of research must be regarded as an integral part of the cost of the research. In keeping with the policy which is effective for the Institute's publications a bill for $3.00 per page will be sent to the authors of papers appearing in this journal. It is intended that the authors shall present these bills for payment to the institutions which have supported their researches. If the institution is unable to make payment the bills are to be returned to the Editorial Secretary marked "No funds available." One hundred reprints without covers will be furnished free. If additional reprints are desired that fact should be indicated on the proper blank sent out with galley proof. The price scale is indicated thereon.

SUBSCRIPTIONS

Subscription price: United States and Possessions and Canada—$6.00; Foreign—$6.60. (Remittances from foreign countries must be in U. S. currency, or the equivalent on basis of current rate of exchange.)

Subscriptions, renewals and orders for back numbers should be addressed to Prince and Lemon Streets, Lancaster, Pennsylvania, or to the American Institute of Physics, 11 East 38th Street, New York.

The Journal of the Optical Society of America is published monthly at Prince and Lemon Streets, Lancaster, Pennsylvania.

Entered as second-class matter at the Post Office at Lancaster, Pennsylvania, under the Act of March 3, 1897. Acceptance for mailing at special rate of postage provided for in the Act of February 28, 1925, embodied in paragraph 4, section 412, P. L. and R., authorized June 19, 1925.

THE OPTICAL SOCIETY OF AMERICA

OFFICERS OF THE SOCIETY

W. B. RAYTON, *President*
Bausch & Lomb Optical Company
Rochester, New York

ARTHUR C. HARDY, *Vice-President*
Massachusetts Institute of Technology
Cambridge, Massachusetts

L. B. TUCKERMAN, *Secretary*
Bureau of Standards
Washington, D. C.

HENRY F. KURTZ, *Treasurer*
Bausch & Lomb Optical Company
Rochester, New York

The Board of Directors consists of the above officers; the Editor of the Journal; the Past-President; and five elected members:

E. C. CRITTENDEN, *Past-President*
Bureau of Standards
Washington, D. C.

F. K. RICHTMYER, *Editor*
Cornell University
Ithaca, New York

Elected Members

ARTHUR H. COMPTON
Ryerson Physical Laboratory
University of Chicago
Chicago, Illinois

HERBERT E. IVES
463 West Street
New York, New York

CARL W. KEUFFEL
Keuffel & Esser Company
Hoboken, New Jersey

GEORGE B. PEGRAM
Columbia University
New York, New York

R. C. GIBBS
Department of Physics
Cornell University
Ithaca, New York

THE OPTICAL SOCIETY OF AMERICA was organized in 1916 "*to increase and diffuse the knowledge of optics in all its branches, pure and applied, to promote the mutual interests of investigators of optical problems, of designers, manufacturers and users of optical instruments and apparatus of all kinds and to encourage cooperation among them.*" It aims to serve the interests of all who are engaged in any branch of optics from fundamental research to the manufacture of optical goods.

MEMBERSHIP

Regular Members: "Any person who has contributed materially to the advancement of optics is eligible for regular membership."

Associate Members: "Any person who is interested in optics is eligible for associate membership."

Corporate Members: "Any corporation desirous of encouraging the work of the Society is eligible for corporation membership."

The Society cordially invites to membership all who are interested in any branch of optics, either in research, in instruction, in optical or illuminating engineering, in the manufacture and distribution of optical goods of all kinds or in physiological and medical optics.

ANNUAL DUES

Regular members, $7.50; Associate members, $5.00; Corporate members, $50.00. These dues include subscription to the Society's official journal, the *Journal of the Optical Society of America.*

MEETINGS

The Society holds two meetings per year: An annua meeting in the autumn and a midwinter meeting jointly with the American Physical Society.

For further information concerning the Optical Society of America address the Secretary, Dr. L. B. Tuckerman, Bureau of Standards, Washington, D. C.

ROCHESTER, NEW YORK SECTION OF THE OPTICAL SOCIETY OF AMERICA

C. J. STAUD, *President*
MRS. H. G. KINGSLAKE, *Secretary*

H. A. CLARK, *Vice-President*
H. E. SEEMANN, *Treasurer*

Councilors: F. E. ALTMAN, F. C. FAIRBANKS, G. FASSIN, L. V. FOSTER, C. E. BAHN (*ex-officio*)

THE AMERICAN INSTITUTE OF PHYSICS

INCORPORATED

GOVERNING BOARD

For The American Physical Society:

KARL T. COMPTON, *Chairman*
Massachusetts Institute of Technology

GEORGE B. PEGRAM, *Secretary*
Columbia University

JOHN T. TATE
University of Minnesota

For The Optical Society of America:

E. C. CRITTENDEN
Bureau of Standards

PAUL D. FOOTE
The Gulf Companies

F. K. RICHTMYER
Cornell University

For The Acoustical Society of America:

HARVEY FLETCHER
Bell Telephone Laboratories

VERN O. KNUDSEN
University of California at Los Angeles

WALLACE WATERFALL
The Celotex Company

For The Society of Rheology:

E. C. BINGHAM
Lafayette College

A. STUART HUNTER
du Pont Rayon Company

S. E. SHEPPARD
Eastman Kodak Company

For The American Association of Physics Teachers:

HOMER L. DODGE
University of Oklahoma

PAUL E. KLOPSTEG
Central Scientific Company

FREDERIC PALMER
Haverford College

ADMINISTRATIVE STAFF

HENRY A. BARTON, *Director*
JOHN T. TATE, *Adviser on Publications*
MADELINE M. MITCHELL, *Editorial Secretary*
Office: 11 East 38th Street, New York, New York

The American Institute of Physics is a membership corporation of which five societies are the founding members. These five societies are the principal national societies devoted to pure and applied physics in America. Their names, and those of their representatives who form the Governing Board of the Institute, are given above. The principal work of the Institute is the publication of journals sponsored by the societies or by itself. The names and the editors of the journals are also listed above.

The broad purpose of the Institute is to represent, in all matters of wide or common interest, the five thousand or more members and subscribers associated with the Founder Societies and the journals. It aims to advance the science and profession of physics, and to promote cooperation between pure research, the applied sciences and the industries. To achieve these aims, it is greatly in need of an endowment and is empowered by law to administer grants and funds of any kind.

CONTENTS—VOLUME 24

JANUARY, 1934

Optical Rotation of Unpolarized Light . ALEXANDER LANGSDORF, JR., AND LEE A. DUBRIDGE 1
Note on Preceding Paper by Langsdorf and DuBridge . . . . . R. W. WOOD 4
Seeing in Sodium-Vapor Light . . . . . M. LUCKIESH AND FRANK K. MOSS 5
Microscopic Study of Pigments Using Ultraviolet Light . . . . . GEORGE S. HASLAM AND CLYDE H. HALL 14
Reflection Densitometer . . . . . J. W. MCFARLANE 19
Construction and Use of a Pfund Parallel Plate Refractometer . . . . . M. ALDEN COUNTRYMAN AND WILLIAM KUNERTH 25

FEBRUARY, 1934

Young's Experiment with Newton's Rings . . . . . W. W. SLEATOR AND A. E. MARTIN 29
Characteristics of the Sodium Lamp as Influenced by Vapor Pressure . . . . . GORTON R. FONDA AND ANDREW H. YOUNG 31
Polarization of Light at Sea . . . . . E. O. HULBURT 35
Influence of Certain Photographic Errors on the Profiles of Absorption Lines in Stellar Spectra . . . . . C. T. ELVEY AND CHRISTINE WESTGATE 43
Proceedings of the Eighteenth Annual Meeting of the Optical Society of America, Buck Hill Falls, Pennsylvania, October 19–21, 1933 51

MARCH, 1934

Current Advances in Photographic Photometry . . . . . GEORGE R. HARRISON 59
Development of the Photographic Objective . . . . . R. KINGSLAKE 73
Effect, on the Latent Image, of Post-Heating and of Melting the Gelatin . . . . . A. J. REARDON AND H. P. GRIGGS, S.J. 85
Some Comments on the Ives Theory of Flicker . . . . . PERCY W. COBB 91

APRIL, 1934

Highly Reflecting Films of Zinc Sulphide . . . . . A. H. PFUND 99
Zone Plate Determination of Dominant Wave-Length of Filtered Lamp Light . . . . . JOSEPH W ELLIS AND BARTHOLD W. SORGE 103
Dependence of Flicker on the Dark-Light Ratio of the Stimulus Cycle . . PERCY W. COBB 107
Resistance and Radiation of Tungsten as a Function of Temperature . . . . . W. E. FORSYTHE AND E. M. WATSON 114
Financial Statement J. O. S. A.—R. S. I. for 1933 119

MAY, 1934

Anomalous Dispersion by Diffraction . . . . . A. H. PFUND 121
Sensitivity of Photographic Films to X-Rays at Low Temperatures . . . . . G. E. M. JAUNCEY AND H. W. RICHARDSON 125
Interferometer Method for Measuring the Amplitude of Vibration of Quartz Bar Crystals . . . . . SAMUEL H. CORTEZ 127
Area and Brightness of Stimulus Related to the Pupillary Light Reflex . . . . . M. LUCKIESH AND FRANK K. MOSS 130
Detection of Small Color Differences in Dyed Textiles . . . . . ROBERT D. NUTTING 135
Reflecting Power of Powders in the Far Infrared Region . . . . CARROLL W. BRYANT 139
Erratum: The Development of the Photographic Objective . . . . . R. KINGSLAKE 142

JUNE, 1934

Rayleigh's Law of Scattering in the Infrared . . . . . A. H. PFUND 143
Spectral Distribution of Radiation from High and Low Pressure Hg Arcs . B. T. BARNES 147
Study of the Errors in the Photographic Method of Comparing Light Intensities . . . . . J. TRACY LAY AND I. CLYDE CORNOG 149
Note on Photographic Sensitivity after the Herschel Effect . . . . . JULIAN M. BLAIR 155
Secondary Interference Fringes . . . . . W. F. C. FERGUSON 157
Proceedings of the New York Meeting of the Optical Society of America, February 23–24, 1934 159

JULY, 1934

Reflector for All Types of Surfaces . . . . . FRANK BENFORD 165
Absorption of Ultraviolet and Visible Light by Water . L. H. DAWSON AND E. O. HULBURT 175
Ultraviolet Sources and Their Radiation W. E. FORSYTHE, B. T. BARNES AND M. A. EASLEY 178
Portable Ultraviolet Meters . . . . . A. H. TAYLOR 183
Heat as an Agent for the Production of the Latent Photographic Image . . . . . JULIAN M. BLAIR AND PHILIP A. LEIGHTON 185
Specification of Whiteness . . . . . DAVID L. MACADAM 188
Reflection-Factors of Various Materials for Visible and Ultraviolet Radiation . A. H. TAYLOR 192
Erratum: Interferometer Method for Measuring the Amplitude of Vibration of Quartz Bar Crystals . . . . . SAMUEL H. CORTEZ 194

AUGUST, 1934

Time Intensity Relation and Spectral Distribution of the Radiation of the Photo-Flash Lamps . . . . . W. E. FORSYTHE AND M. A. EASLEY 195
Optical Factors in Caesium-Silver-Oxide Photoelectric Cells . . . . . HERBERT E. IVES AND A. R. OLPIN 198
Eyepiece for Measuring the Percentage Plane-Polarization in a Beam of Light . F. E. WRIGHT 206
Measurement of a Strain Ratio in an *X*-Cut Quartz Crystal . M. Y. COLBY AND SIDON HARRIS 217
Absorption of Light by Sea Water . . . . . E. B. STEPHENSON 220
Source of Ultraviolet Continuous Radiation . . . O. S. DUFFENDACK AND J. H. MANLEY 222
Reflectivity of Intermetallic Systems . . . . . J. WULFF 223
Note on the Transmission Characteristics of Four Green Glass Filters . ROBERT LIVINGSTON 227
Erratum: Reflection-Factors of Various Materials for Visible and Ultraviolet Radiation . . . . . A. H. TAYLOR 228

SEPTEMBER, 1934

Appearance of Atoms as Determined by X-Ray Scattering . E. O. WOLLAN AND A. H. COMPTON 229
Visual Spectrophotometry . . . . . K. S. GIBSON 234
Quantitative Optical Test for Telescope Mirrors and Lenses . . . . . J. H. KING 250
Grating Interferometer . . . . . BERTRAND P. RAMSAY 253
Notice of the Ninth International Congress of Scientific and Applied Photography, Paris, July 7–13, 1935 259

OCTOBER, 1934

Optical Constants of Polished and Sputtered Molybdenum Surfaces . . . R. D. SUMMERS 261
Complementarism of the Standard O. S. A. and I. C. I. Observers . . . I. H. GODLOVE 264
Colorimetry with Reflection Standards: A Quasi-Psychological Method.—Interconversion of Physical and Psychological Color Specifications . I. H. GODLOVE AND A. E. O. MUNSELL 267
Densitometry and Photographic Printing. Illumination of the Negative and Its Effect upon Density . . . . . CLIFTON TUTTLE 272
Negative Illumination in Projection Printing . . . . . CLIFTON TUTTLE 279
Phosphorescence of Glass Solarized by Soft X-Rays . . . H. KERSTEN AND C. H. DWIGHT 285

NOVEMBER, 1934

"Depressed" Beam of the Motor Car Headlight. II . . . . . L. W. TAYLOR 287
On Compensating for the Aberrations of the Concave Grating . . . . . R. O. ANDERSON AND J. E. MACK 292
Flicker Relations within the Fovea . . . . . FRANK A. GELDARD 299
Note on Higher Order Reversals in the Solarization Region . L. T. DEVORE AND W. J. SAYLOR 303
Visual Thresholdometer . . . . . M. LUCKIESH AND FRANK K. MOSS 305
Annual Report of Secretary O. S. A. for 1933 308
Annual Report of Treasurer O. S. A. for 1933 310
Treasurer's Report to Board of Directors for 1933 311

DECEMBER, 1934

Interference Colors in Oil Films on Water . . . . . KATHARINE B. BLODGETT 313
Photophysical Changes in Silver-Silver Chloride Systems . A. E. CAMERON AND A. M. TAYLOR 316
Solarization at Low Intensity . . . . . A. J. REARDON AND H. P. GRIGGS, S.J. 331
Transparency of Thin Metallic Films in the Ultraviolet . . . . . H. HAROLD HARTZLER 339
Indirect Method for Measuring Stray Light within the Human Eye . . . . . S. HOWARD BARTLEY AND GLENN A. FRY 342
Auxiliary Lens for Use with the Concave Grating . . . J. B. GREEN AND R. A. LORING 348
Author Index to Volume 24 351
Analytic Subject Index to Volume 24 353
